ABOUT

Backend engineer with 10+ years of experience building production systems across fintech, energy, and mobility. Specialized in cloud-native architecture (AWS/Azure), microservices, and event-driven systems. Actively builds and ships AI-driven applications with 6+ hackathon wins, including 2 consecutive 1st places in Berlin. Studies ML fundamentals hands-on (Transformers, VAE, Seq2Seq) to understand the underlying systems deeply, not just as an end-user.
